We ensure the highest quality

At Sii, we are focused on delivering the highest possible quality of our services while working remotely with our clients. This is feasible thanks to:

TEAMWORK ORGANIZATION

- We try to have the whole team in one location
- When the team is distributed, we are using a well-defined work model (Internal IT is distributed and responsible for tools like Skype with persistent chat rooms, SharePoint, Jira)
- Regular meetings to maintain information flow and control project status
- Jira as the main tracking tool

CODE QUALITY

- Coding standards and guidelines
- Code review
- Task lifecycle

TESTING

- Test cases management tools
- Static code analysis tools
- Test automation frameworks

3-STEP ONBOARDING PROCEDURE

- Mobilization and M&T adoption
- Connection and documentation transfer
- Team alignment and delivery start

We have a client-centered approach

Sii WRICEF FACTORY is our team of skilled functional and technical employees of the SAP Competency Center. Thanks to them, SAP projects are implemented in a cost-effective, standardized and efficient way. With 30+ experienced ABAP developers, Sii has the capabilities to design and perform a custom SAP modification suited to very specific requirements of your business.

## How does it change the way nearshoring services are delivered?

- bespoke methodology and unique approach
- great adaptability to the needs of various clients and business sectors

- easy scalability facilitating the management of project peaks
- efficient communication, allowing both Sii's and client's employees to function as a joint team

See an example of how we can cooperate with the customer:

We ensure the highest quality

Every customer has different cooperation requirements and procedures. At Sii, we are able to easily adjust to their specific requirements. Here are two examples of our SAP projects executed in accordance with the instructions from the customer.
